### TREATMENT OPTIONS

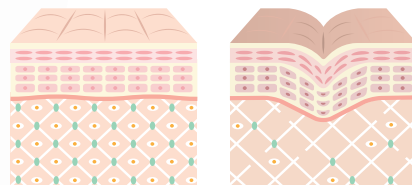

#### Secret RF Microneedling

This treatment works to stimulate neo-collagenases via hemostasis and coagulation through tiny microneedles. The microneedles are delivered smoothly depositing the radio frequency energy at various depths in the skin where you need it most.

#### Secret DUO Non-Ablative Resurfacing

The Secret DUO fractional laser works to lightly resurface skin to help reveal the youthful glow lost by years of sun damage and environmental skin aging factors.

### THE IMPORTANCE OF COLLAGEN TO SKIN

Collagen keeps our skin youthful looking, soft, and smooth. As we age, our collagen reserve diminishes leaving us with fine lines, wrinkles and skin that is slower to bounce back.
